SUMMARY

Full-stack ASP.NET / .NET Developer with hands-on backend experience across ASP.NET Core Web APIs, SQL Server, and authentication/authorization systems, plus front-end development, deployment, and QA across the full software lifecycle. Currently contributing to the requirements definition, UI implementation, and testing of a multi-tenant authentication and authorization platform, from early development through MVP.

EXPERIENCE

Junior Software Developer — *Vistrut Technologies* Apr 2025 – Present | Panvel

- Build and maintain responsive front-end interfaces using Tailwind CSS, Bootstrap, and JavaScript across internal and client-facing applications.
- Define functional requirements and test authentication/authorization workflows for a multi-tenant platform, validating role-based access control and session behavior across products and tenants.
- Validate backend APIs and integration points using Swagger and Postman, identifying and reporting issues before release.
- Deploy and manage updates to live production sites via FileZilla and Azure.

Software Development Intern — *Vistrut Technologies* Oct 2024 – Apr 2025 | Panvel

- Redesigned and optimized a client website (Ashram project), improving UI/UX and responsiveness.
- Integrated the Razorpay payment gateway and FullCalendar for event management.
- Worked directly with the client to implement new features and resolve reported bugs.
- Deployed websites to live servers and managed client-side updates.

PROJECTS

Brahmanda Tatva — Multi-Tenant Authentication & Authorization Platform

- Defined functional requirements and behavior specifications for authentication, role-based access control, tenant provisioning, and invitation workflows, working directly with the development team to translate them into technical specs.
- Implemented UI screens across multiple product modules by adapting and replicating the platform's design system, keeping visual and functional behavior consistent across tenants.
- Owned functional and validation testing for authentication, authorization, and tenant-management flows using Postman, identifying issues ahead of release.
- Drove the project day-to-day with architectural guidance and test-scenario input from a senior developer; reached MVP, with additional modules planned before commercial launch.

Technologies: *.NET 9, ASP.NET Core MVC, EF Core 9, SQL Server, Postman*

AuthServer Authentication Platform

- Internal authentication server for user login and access management.
- Performed API testing and validation using Swagger and Postman; tested JWT-based authentication workflows.
- Contributed UI improvements and bug fixes; documented authentication-related features.

Technologies: *.NET 8, ASP.NET Core Web API, SQL Server, JWT, Swagger*

Jyoti Ashram Website

- Responsive website for a client to manage events, donations, public information, and admin functionality.
- Improved UI and responsiveness using Tailwind CSS; helped integrate event management via FullCalendar.
- Supported payment gateway integration and testing; worked with senior developers on deployment and bug fixes.

Technologies: *.NET 7, ASP.NET Core MVC, SQL Server, Tailwind CSS, Bootstrap, Razorpay, Azure*

Vistrut Task Tracker

- Internal task management application for workflow and task tracking.
- Implemented front-end enhancements and responsiveness improvements; supported backend feature work and bug fixing.
- Tested application functionality and verified workflows across modules alongside senior developers.

Technologies: *.NET 7, ASP.NET Core MVC, SQL Server, Bootstrap, Knockout.js*

EDUCATION

B.Tech, Computer Engineering — *Ajeenkya DY Patil College of Engineering* Nov 2021 – May 2024 | Pune

- CGPA: 7.24

Diploma, Computer Engineering — *MIT Polytechnic* 2017 – 2021 | Pune

- Percentage: 90.29%

CERTIFICATIONS & COURSES

- Oracle Cloud Infrastructure 2023 Certified Foundations Associate — OCI compute, storage, networking, and IAM fundamentals.
- Alpha (Data Structures & Algorithms with Java) — Apna College — problem-solving, time complexity, and algorithm implementation in Java.
- 100x Devs Full Stack Course — JavaScript, React.js, Node.js, Express.js, REST APIs, JWT, Git/GitHub.

TECHNICAL SKILLS

Frontend: HTML, CSS, Tailwind CSS, Bootstrap 5, JavaScript

Backend: C#, ASP.NET Core MVC, ASP.NET Core Web API, JWT Authentication

Database: SQL Server, Entity Framework Core

Tools: Git, Swagger, Postman, FileZilla, Azure

Other: Functional Requirements Definition, Manual QA & Testing, Multi-Tenant Systems

LEADERSHIP & ACTIVITIES

- Photography Committee Head — MIT Polytechnic & Ajeenkya DY Patil University: led event photography activities and coordinated student volunteers during academic and cultural events.
